

# Mail Tracking from anywhere.

*Take advantage of Intelligent Mail® data to track your mail as it is processed through the USPS® mail stream.*

IMb™ Tracing Solution

MailStream Navigator provides detailed mail piece tracking with the ability to drill down to individual records to track critical mail pieces through the USPS® mail stream. Businesses have the ability to search by multiple fields making locating tracking information about your customer's mail simple and easy.

- **Detailed data tracks individual records**
- **Total flexibility to segment information**
- **Custom web portal for researching**
- **Multiple search fields**
- **180 days of mail piece history**
- **IMb™ Tracing data updated hourly**
- **USPS® scan rate of 90 -95%**

## WE KEEP IT SIMPLE!

The implementation of MailStream Navigator is an easy process that you will be guided through by an installation coordinator, and will act as a liaison to the Post Office making sure that you receive all required Post Office approvals. After the install, our world class technical support department will be available 24/7 365 days a year for assistance.

## HOW DOES IT WORK?

MailStream Navigator takes the output from an AutoMail® mail run and uploads it to Mailstream Navigator. The USPS®IM Tracing file is imported into MailStream Navigator and matches to AutoMail® data based on the IMb™ barcode.
